

1. Please go to the web site:

alza.at

and spend a few minutes looking around the site.

2. Find an Apple laptop with 128 GB of RAM. What are its maximum battery life and battery capacity?

3. Compare the RX 9060 XT (graphics card) products. Find one variant of that product that has the lowest recommended power source.

4. Build your own PC with the configurator. Add it to the shopping cart.

5. Create an account on the web site using the credentials provided. Go to the shopping cart and check out. Stop before making any payment.
